Vacuum Sack Lifter

**All Types of Sacks**

**OBJECTIVES**

Effortless vacuum lifting of all types of sacks from 10 to 80 kg and increased productivity. It is a simple and reliable means for one operator to handle sacks from 10 to 80 kg.

**Advantages**:
- Effortless lifting
- Maximum performance and productivity
- Optimal working conditions
- Improvement in ergonomics
- Increased operator safety
- Very little maintenance required

**EXAMPLES OF INSTALLATIONS**

1. **Vacuum Sack Lifter**: fitted with a control handle equipped with a stay-put lever valve allowing a self-stabilization of the load at any height, without any adjustment. Ergonomic handle design, preventing wrist elongation.
2. **Triangular post mounted jib crane**: to provide a lifting stroke of 1,700 mm (overhead room 3m.)
3. **Large suction foot**
4. **Suction tube**
5. **360° rotation lifting tube**
6. **Lifting head**
7. **Sack dumping unit**
8. **Vacuum sack lifter with conveyor**
9. **Rubber hole**
10. **Hessian bags vacuum spike gripper to lift sacks of grains**
